

CIVIL HARASSMENT & INVESTIGATIVE DOSSIER

COMBINED EVIDENTIARY ACTION BRIEF FOR COUNSEL AND INVESTIGATOR ACTION

Metric / Profile Dimension	Case Data Detail & Evidentiary Reference
Subject Client	Bijan Lee Pourazari (DOB: 03/28/1991, Age 33 at incident)
Primary Civil Defendant	Premier Crop Systems, LLC (and single-member LLC CEO)
Secondary Alleged Adversaries	Coordinated Reddit Cyber-Harassers (Alleged Riot Games Affiliates)
Domestic Hazard Baseline	Partner holds Felony Restraining Order against Attempted Murder Parolee
Client Certified Disability	Bipolar 1 (Active CA SDI Claim ID: DI-1015-505-083; Weekly: \$1,760.00)
Dual-Filing Legal Counsel	Bob Nehoray, Esq. (Workers' Comp); AZ Law (Valentina) (Wrongful Termination)
Target Litigation Value	\$4,505,000 (Detailed FEHA, ERISA, Wage Theft, and IIED Damages Matrix)

1. EXECUTIVE OVERVIEW: THE COMPREHENSIVE ACTION ROADMAP

This Dossier serves as a unified strategic plan connecting two parallel legal matters: an open-and-shut civil and workers' compensation action against Premier Crop Systems, LLC, and an active investigation into targeted anti-LGBTQ+ cyber-harassment. By separating proven, fully-documented workplace retaliation from the highly distressing allegations of coordinated Reddit cyberbullying, we present a credible, legally rigorous posture designed to secure contingency representation, justify state-certified disability status, and prepare for private investigator unmasking. To ensure legal integrity, all urological and psychiatric treatments are mapped chronologically to establish industrial causation under California's Hikida and Wilson doctrines, while our current domestic environment is detailed to substantiate the legal requirement of 'sustained fear' for criminal threat prosecution.

STRATEGIC POSITIONING: The civil litigation against Premier Crop Systems, LLC is 100% provable with audit trails from Paychex and transcribed panic attacks. The anti-LGBTQ+ Reddit cyberbullying is strictly treated as **ALLEGED** at this stage. However, given the severe physical threat already present in the household (an active felony restraining order against an attempted murderer), these online threats constitute extreme, actionable, and reasonable danger, establishing immediate probable cause to hire a Private Investigator and execute subpoenas.

2. THE PROVABLE CIVIL CORE: PREMIER CROP SYSTEMS, LLC MISCONDUCT

The client's primary civil claim is a multi-million-dollar wrongful termination, retaliation, and wage theft action against his former employer, Premier Crop Systems, LLC. The liability model is established through objective, contemporaneous records that leave the defendant with zero viable legal defenses.

A. Retaliation for May 30, 2024 Emergency Surgery & The 'Uncentered Div' Pretext

On May 30, 2024, during standard work hours, the client suffered an acute urological emergency, which was diagnosed by Dr. Phuong Ly at Mission Heritage Urgent Care as acute priapism with impending compartment syndrome, necessitating an immediate emergency room transfer. Dr. James P. Meaglia, MD, executed an invasive bedside surgery involving the bilateral insertion of 18-gauge needles, manual aspiration of 'dark sludgy blood,' and phenylephrine chemical washouts. The client was forced to exhaust his accrued PTO and take unpaid leave to survive this trauma. Rather than accommodating this severe medical event, the VP slandered the client in corporate performance reviews, penalizing him for being absent and 'unreliable' on the day of his emergency surgery. This culminated in his retaliatory termination in April 2026. The employer utilized an absurd technical pretext: a styling disagreement over an 'uncentered div' layout block. In reality, the client—an award-winning Senior Software Engineer who architected the platform's core architectures—was raising correct architectural objections against nesting unstable, legacy, non-responsive jQuery elements inside modern Angular components, advocating instead for modern CSS Grid and Flexbox layouts. This transparent pretext confirms retaliatory animus.

THE SURGICAL BLOW-BY-BLOW: Emergency urological records from May 30, 2024, document that Dr. Meaglia prepped and draped the client, injected 1% lidocaine with a 27G needle, inserted 18G needles bilaterally directly into the corpora cavernosa, aspirated stagnant 'dark sludgy' blood, and irrigated the tissue with 1 mg of phenylephrine in 100 mL of isotonic saline. The needles were left in situ for 10–15 minutes, followed by 10 minutes of manual compression. This violent urological trauma meets all four Wilson factors for a 'catastrophic injury,' allowing the client to fully add on psychiatric PTSD and anxiety ratings under CA Labor Code § 4660.1(c)(2)(B).

B. Fiduciary Wage Theft & The COBRA Healthcare Severance Gap

Premier Crop Systems, LLC committed a strict liability fiduciary breach under ERISA Section 406 and wage theft under CA Labor Code Section 221. Throughout his employment, the company siphoned 5% of the client's paychecks under the guise of 401(k) loan repayments. However, instead of depositing these funds into the retirement trust, the CEO retained the siphoned cash in corporate operating accounts. When audited by third-party administrator Paychex, the CEO engaged in misrepresentations to conceal corporate liability. Concurrently, the VP forced the client to work off-the-clock during the holidays—coercing him to submit fake PTO requests while collaborating on Discord with Infragistics and Reveal BI engineers to launch the Analyst-Studio platform. Most egregiously, following his termination, the company willfully withheld the client's mandatory COBRA health insurance enrollment forms for over three months. This severed his access to healthcare during active spinal and psychiatric crises, forcing him to face three subsequent emergency room priapism relapses completely uninsured, accumulating \$45,000 in outstanding personal medical debt.

3. THE DOMESTIC THREAT BASELINE & THE CRIMINAL STANDARDS

To establish the legal validity of civil harassment damages and the 'sustained fear' required for a felony criminal threats prosecution, we must explicitly map the client's current household danger. Our fear of physical violence and digital escalation is not an abstract reaction; it is grounded in an ongoing, legally verified threat.

A. The Household Safety Threat Profile: An Attempted Murder Parolee

The client's girlfriend has an active restraining order, issued through the California Felony Court system, against a specific individual who was convicted and imprisoned for Felony Attempted Murder. This dangerous individual is currently out on parole and actively stalking her. To ensure her immediate survival, she has been forced to flee her home and is currently living in hiding at a friend's private residence. This physical threat is active, verified by court records, and documented in contemporaneous text messages. Because the household is actively navigating an immediate, life-threatening danger from an attempted murderer, the client's psychological baseline is in a state of chronic, heightened hyper-vigilance. Consequently, any digital bullying, sexual harassment, or online doxxing is not experienced as a minor nuisance; it is experienced as an immediate, clear, and present danger that could signal a physical escalation from the stalker. In a court of law, this concurrent threat profile makes the client's sustained fear legally reasonable and highly actionable.

CONCURRENT DANGER CALLOUT: Firing an employee, siphoning his retirement savings, and stripping away his health insurance for over three months while knowing his immediate household was in the midst of a Felony Court trial against an attempted murderer represents a level of 'outrageous and extreme' conduct that easily meets the standard for Intentional Infliction of Emotional Distress (IIED) and FEHA general damages, valued at \$1,500,000 for household impact.

B. Coordinated LGBTQ+ Sexual Cyberbullying and Probable Cause for Private Investigation

During this window of vulnerability, perpetrators initiated a highly coordinated, targeted cyber-harassment campaign. Specifically, these actors took private, intimate sexual content that the client had shared strictly with consenting adult sex partners—fully compliant with the strict federal 18 U.S.C. § 2257 framework for consensual adult material—and posted weaponized, highly bullying, and sexually explicit comments about them on subreddits. Because of the extreme, targeted nature of the comments, this campaign violated Reddit's Terms of Service, prompting immediate intervention by Reddit moderators who removed the comments. At this stage, the connection to Riot Games or its affiliates is **ALLEGED**. The client does not possess direct proof linking the company, but the highly specific, bullying nature of the statements provides more than enough **probable cause to retain a licensed Private Investigator**. The investigator's mandate will be to issue subpoenas and execute unmasking protocols to determine the true identities of these anonymous accounts. If they are discovered to be Riot Games employees acting on corporate devices or during work hours, the civil and statutory liability for the corporation will be catastrophic.

4. CRIMINAL EXPOSURE MATRIX & CIVIL DISCOVERY ROADMAP

Under California law, online harassment that crosses into targeted intimidation is treated with the utmost severity. Should the private investigation reveal that the perpetrators acted in coordination, they face catastrophic felony exposure.

Figure 4.1: California consecutive multi-count sentencing showing cumulative hate crime enhancements.

A. The Multi-Count Exposure Mechanics & Strike Status

Because the threats occurred across multiple days and threads, each represents an independent criminal act. Under CPC § 422(a), each felony count carries up to 3 years in state prison (9 years total for 3 counts). Because the cyberbullies targeted the client in coordination based on sexual orientation, the 'in concert' hate crime enhancement under CPC § 422.75 triggers an automatic consecutive 4 years per count (12 years total), leading to an **aggregate exposure of 21 years in California State Prison**. Furthermore, a conviction under CPC § 422 is a serious felony and a **'Felony Strike'** under California's Three Strikes Law (CPC § 1192.7(c)(38)), requiring offenders to serve a mandatory **minimum of 85% of their sentence** behind bars with zero standard good-behavior credit.

B. Civil damages & Unmasking target discovery

To dismantle the throwaway accounts on Reddit, our Private Investigator and counsel will follow a dual subpoena path. First, we will subpoena Reddit, Inc., to secure the historical IP access logs, MAC device addresses, and registration emails for the offending handles. Second, we will subpoena the underlying Internet Service Providers (e.g., Spectrum, Comcast) to match the IP timestamps to real-world names and household addresses. The civil damages target matrix, summarizing our combined claims, is detailed below:

Damage Category	Statutory Basis & Calculation	Value Target
Back & Front Pay	4 months lost wages plus 12 months career damage (\$180k/year market rate)	\$240,000
Uninsured Medical Debt	Outstanding liabilities from emergency urological treatment during COBRA gap	\$45,000
ERISA COBRA Penalties	Strict liability penalty of up to \$110/day for 100 days of withheld forms	\$11,000
401(k) Wage Theft	Restoration of siphoned 5% paycheck deductions plus lost interest	\$5,000
FEHA Emotional Distress	Severe medical PTSD, documented panic attacks, and active Bipolar 1 care	\$1,204,000
Traumatic Household Impact	Extreme duress: cutting off safety net during partner's Felony attempted murder trial	\$1,500,000
Punitive Damages	CA Civil Code 3294 punishment for fraud, malice, and systemic oppression	\$1,500,000
TOTAL TARGET CASE VALUE	Combined Civil Wrongful Termination and Retaliation Claims	\$4,505,000
